Instruction Manual for

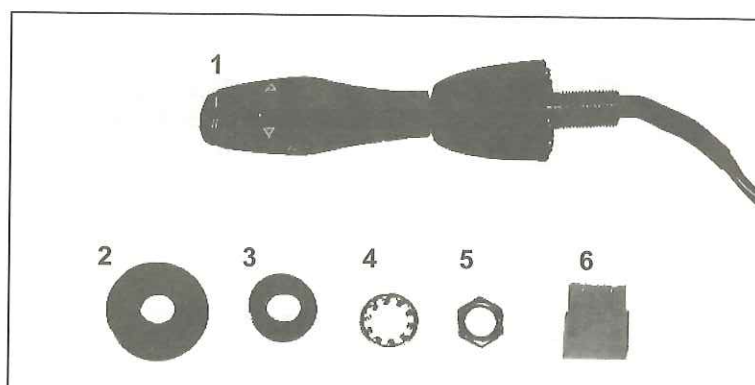

CM-30

CM-35

Command Module

1. Contents

Item	Description	QTY
1	Command Module CM-30/35	1
2	Adapter bus external	1
3	Adapter bus internal	1
4	Spring washer	1
5	Nut M10	1
6	Connector housing 8-pin	1

2. Installation

The CM-30/35 is a universal Command Module that can be installed in many locations on the steering wheel column.

- 1) Determine the optimal location for the Command Module (1) for easy reach by the driver and where it secure can be installed.
- 2) De-assemble the steering wheel column cover.
- 3) Drill a hole (diameter 10mm).

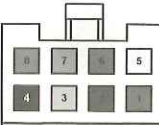

CAUTION: Before drilling any holes, make sure there are no parts or wires behind the selected location, which might interfere or be damaged by installing the Command Module.

- 4) Shift the External Adapter Bus (2) over the thread axe (1) and rotate it in the correct position.
- 5) Put the wires and thread axe through the hole.
- 6) Place the Internal Adapter (3), the Spring Washer (4) and tighten the Nut (5) firmly.
- 7) Guide the wiring to Cruise Control Harness and secure it.
- 8) Re-assemble the Steering wheel cover and ensure that that wires run free and that the Command Modules is located correctly.
